

TRINITY WESTERN UNIVERSITY

Trinity Western University

Undergraduate Course Syllabus

Course Number: LDRS 101

Course Name: Learning with Technology

Semester and Year: SP 2025

Instructors: Kelly Marjanovic

Contact Information: Kelly.Marjanovic@twu.ca

Office Hours: Upon Request

Corequisites or Prerequisites: None

Cross-listed: MCOM 101

Semester Hours: 3

Course Backchannel (Discourse): Look for the 'Leadership 101' category

We acknowledge that Trinity Western University, Langley campus is located on the traditional ancestral unceded territory of the Stó:lō people.

Course Description:

Introduces theories and competencies related to learning and thriving in a digital world. Explores how learners are situated in *'the digital'* throughout their lives and how they can use digital technologies to enhance and enrich their experience of learning, working, and playing. Learners will begin to build a curated digital footprint, initiate and develop personal and professional learning networks; develop competencies to allow them to evaluate and choose digital platforms and tools that are safe and ethical; and explore how to use digital technologies to discover, curate, connect, and share knowledge with their communities.

Course Design

Learning with Technology is a skills-based course where you'll "learn by doing," building the skills and knowledge to thrive in both academic and professional technology-driven environments. This course is designed to empower you with hands-on learning, opportunities for independent study, and community-building experiences. With this course, you'll gain the skills to thrive in a digital world, supporting both your academic and career journey.

This course is designed to be completed asynchronously, meaning that there are no scheduled class times. You can work according to your own schedule within the six months you have to complete the

course. There may be some assignments which require you to schedule a time, at your convenience, to meet with your instructor for an assessment conversation.

That said, this is a full university level course with an expected workload similar to a synchronous or face-to-face course (e.g., a 12-week, 3-semester hour course likely requires 9-12 hours of study per week). The course includes suggested timelines; we strongly recommend that you meet these to ensure that you succeed in building your knowledge throughout the course. It would be to your significant disadvantage to submit everything at the end of the course.

Online courses require learners to be well-organized and self-motivated, and we have included supports for you to help you develop strong learning habits that will ensure your success. For example, there are several learning activities throughout the course that are designed to help you to succeed in the course assignments, upon which your final grade will be determined. The course assignments are an opportunity to demonstrate to your instructor your understanding of the course learning outcomes. As you complete the activities and assessments, we encourage you to practice evaluative judgement, or the ability to judge for yourself the quality of your work.

Course Learning Outcomes:

	Course Learning Outcomes	Student Learning Outcomes
1	Build and customize technology-integrated workflows to enhance and enrich your learning journey.	Knowledge and its Application
2	Apply digital literacy skills to evaluate the legitimacy, credibility, and reliability of online resources for academic study.	Knowledge and its Application, Cognitive Complexity.
3	Practice evaluative judgment to document your process of learning in complex domains of knowledge.	Cognitive Complexity
4	Create a personalized narrative to document and express your learning process.	Aesthetic Expression and Interpretation, Inter- and Intra-Personal Wellness
5	Evaluate digital tools, platforms, and interactions based on ethical principles.	Social Responsibility and Global Engagement, Leadership, Inter-and intra-personal Wellness
6	Develop personal and professional learning networks to discover and share knowledge, collaborate with others, and become engaged digital global citizens.	Inter- and Intra-Personal Wellness, Social Responsibility and Global Engagement, Leadership.

7	Create inclusive digital communities which embody a sense of belonging, connection, and Christian hospitality.	Spiritual Formation
---	--	---------------------

[See TWU's Student Learning Outcomes here.](#)

Required Texts and Materials:

All materials will be provided online.

Course Learning Evaluation:

The course grade will be determined by the satisfactory completion of all requirements.

Assessment	Assesses Course Learning Outcome	Suggested Due Date
Assignment 1: Reflective Journal	1-4	End of Unit 3
Assignment 2: Digital Citizenship Blog	1-7	End of Unit 5
Assignment 3: Digital Literacy Portfolio	1-7	End of Unit 6

Assessment

Please see the Assessment tab in Moodle for Assignment instructions, including the grading rubrics. Any updates to assignment details will be added on Moodle.

Assignment 1: Reflective Journal

Part 1: Reflective Journal

After completing Units 1-3, including the learning activities, you are asked to share your learning journal as a 'work-in-progress' demonstrating the knowledge and skills you have gained thus far in the course. This assignment is based on the learning activities in Units 1-3 and is designed to demonstrate your understanding of the course learning outcomes (#1-4).

- First, examine the learning outcomes for each unit and ensure that your journal addresses each outcome. Include your thoughts from the learning activities and be sure to apply concepts to your experiences, evaluating your use of the digital skills presented. We are especially looking for your personal reflection on your learning process.
- Note that this is a chance to present your understanding and application of the course material, ask questions, clarify issues, and connect with your instructor(s). We are looking for evidence that you are engaging the course material and practicing the digital skills introduced.
- To help you make connections and develop your critical thinking skills, you are asked to include a mind map of the three units. Mind maps are useful tools not only to organize your notes but will help you process your learning in this course. You are encouraged to use

[Obsidian](#) to complete this mind map. Be sure to submit the visitors and residents map from Unit 1.

You will submit your journal, including your mind map as part of Assignment 1. You may also use your journal to meet the requirements of Assignments 2 and 3, as each assignment builds on the skills learned in each unit.

Part 2: Assessment Conversation

In addition to submitting your journal you will meet with your instructor for an assessment conversation to explain your learning process and demonstrate your understanding of the course learning outcomes.

An Assessment Conversation is a scheduled meeting where you will:

- **Demonstrate and discuss your work**, showcasing how you have engaged with digital tools, built workflows, and applied digital literacy skills.
- **Explain your learning process**, sharing insights into how you approached assignments and developed key competencies.
- **Defend your progress** using the Competency Development Tracker, a shared document where you will assess your proficiency in relation to the course learning outcomes.
- **Exercise evaluative judgment**, critically analyzing your strengths, areas for growth, and next steps in your digital learning journey.

These conversations are **formative**, meaning they are designed to support your learning and development. They may not result in a grade on your assignment, but you will receive valuable feedback that you can use to improve your standing in the course on your next assessment.

Please book your [Assessment Conversations](#) with your instructor through the [Microsoft Bookings app](#).

How to Prepare for Your Assessment Conversation

- **Use the Competency Development Tracker**: This shared document between you and your instructor aligns course learning outcomes with proficiency indicators across assignments. It is a tool to help you track your progress, evaluate your own learning, and practice evaluative judgment throughout the course. Update this document as you complete each assignment to prepare for the conversation.
- **Prepare specific questions** about your work that you would like to discuss. Make a list ahead of time to ensure we use our time efficiently.
- **Review the course learning outcomes (#1-4)** and take notes on how you would explain your understanding of them. This is an opportunity for self-reflection and assessment.
- **Review your journal entries**: These should demonstrate how you have met the targeted course learning outcomes.
- **Review your mind map** and your visitor and resident diagram: Be prepared to show connections between concepts, apply them to your experiences or current events, and demonstrate personal reflection and critical thinking.

Before the Assessment Conversation

- Be sure to test your video and audio in Teams before your conversation to ensure everything is working correctly.
- Practice how to share your screen in Teams, as well as sharing links in the chat. (See Present content in Microsoft Teams meetings in [MS Office 365 Support](#)).

During the Assessment Conversation

- After a brief introduction, we will review your **Competency Development Tracker** to discuss your progress and address any concerns.
- I will ask you the following questions to guide our discussion:
 1. Overall, how are you feeling about the course and the content?
 2. Are there any specific ways that I can better support your learning?
 3. Do you need increased accountability?
 4. How are you doing in meeting the goals that you set for yourself at the beginning of the course?
- Use your Competency Development Tracker to explain how your assignments demonstrate progress toward proficiency. Highlight specific indicators of proficiency that you have met and areas where you continue to grow.
- Clearly explain how your assignments provide evidence of your learning in relation to the course outcomes.
- Your instructor will provide feedback to help you assess your progress, suggest improvements, and encourage further development.
- Take notes on the feedback and reflect on how you can continue to grow in each of the learning outcome areas.

Note: Do not simply read your assignments or reflections. Instead, highlight key learning moments:

- What do you want your instructor to notice?
- Which indicators of proficiency have been met?
- What are you especially proud of?
- How does your journal demonstrate evidence of learning?

See the section below on Assessment Feedback for the grading rubrics used in this course. Also refer to the Assessment section in Moodle for updated assignment details.

Assignment 2: Digital Citizenship Blog

Part 1: Blog Posts

After completing Units 1-5, including the learning activities, you are asked to share your blog posts demonstrating the knowledge you have gained on the concept of digital citizenship.

This assignment is based on the learning activities in Units 4 and 5, as well as the skills practiced in previous units. Note that you can control the privacy settings for each blog post (e.g., so only your instructor can see it, or for the TWU community, or open access for all). You may have chosen to complete some activities in your journal; please share any relevant entries to demonstrate your understanding of the course learning outcomes.

Part 2: Written Reflection:

Prepare a learning reflection of about 500–600 words reflecting on the development of your understanding of digital citizenship.

In your post, provide the following:

- Your personal description of digital citizenship
- Your revised definition of digital citizenship based on your research of the topic
- A list of university-level study examples of the elements of digital citizenship
- A summary of the primary rights and responsibilities for learning in a digital age

Your post should cover the following aspects:

- **Describe** what happened. What was a highlight from the discussion on digital citizenship?
- **Interpret** the events. How did it make you feel? What was “good” and “bad” about the experience?
- **Evaluate** the effectiveness. What did you learn from it? How beneficial or useful was this discussion?
- **Plan** for the future. What new knowledge or skills do you have and how will your experience inform future learning?

Add a category or tag for your post using the course tag: LDRS 101. Post a comment on one or two blog contributions from your peers.

Part 3: Video Reflection

For the third part of this assignment, you are asked to create a short video (under 5 minutes) describing your learning process as it relates to our course learning outcomes.

Post your video reflection on your blog. Remember that you control the privacy settings, so you can share your video blog with the instructor, your peers, and others outside TWU if you wish.

Note: As with Assignment 1, you will use your **Competency Development Tracker** to self-assess your proficiency level. When you submit Assignment 2, be sure to share a link to your tracker with your instructor(s) so they can provide feedback.

See the section below on Assessment Feedback for the grading rubrics used in this course. Also refer to the Assessment section in Moodle for updated assignment details.

Assignment 3: Digital Literacy Portfolio

This final assessment builds upon your previous two assignments. You are asked to create an e-portfolio to demonstrate your understanding of the course learning outcomes and application of the digital skills learned in this course.

What is an e-portfolio?

- A personal e-portfolio is both a product (a digital collection of artifacts) and a process (of reflecting on those artifacts and what they represent). In other words, your e-portfolio is a website that you create where you will be able to share important assignments, projects, and reflections about your journey this course and how you plan to apply your learnings in your academic and professional context.

Assignment 1: Learning Journal, and *Assignment 2: Digital Citizenship Blog* will give you the building blocks of your portfolio. You will be able to submit (or link to) artifacts of your learning that demonstrate your understanding and proficiency in the course learning outcomes. For example, to show how you have met the outcome “Evaluate digital tools, platforms, and interactions based on ethical principles,” you may want to link to your digital tool evaluation post. Remember that your portfolio is not only a product (a digital collection of artifacts), but also a process. In addition to curating your evidence of learning, you are asked to reflect on your learning in a written statement. See below for instructions.

Part 1: Outcome Reflective Statement

Step 1: Preparation

Review the LDRS 101 course learning outcomes.

Next, review your course concept map you created after each unit in your reflective journal. Revise your map to include your thoughts on the learning activities, assessments, and discussions.

Brainstorm the knowledge, understanding, and skills that you have attained overall, and add those connections to your map. You can also add any key learning from other courses you are taking concurrently that connect with the course learning outcomes of LDRS 101. Use this as a draft or a plan for creating your outcome reflective statement.

Step 2: Collecting Portfolio Artifacts

An artifact is any piece of work that demonstrates what you know or can do. It is evidence that you have learned something. Common student artifacts could be blog/discussion posts, assignments, presentations, to name a few.

Choose artifacts of learning that demonstrate significant growth, insights and/or achievement of the LDRS 101 course learning outcomes. For example, you might want to use the outcome reflective statement to represent these two learning outcomes:

- Practice evaluative judgment to document your process of learning in complex domains of knowledge.
- Create a personalized narrative to document and express your learning process

Select one or more artifacts for each LDRS 101 course learning outcome.

Step 3: Write it! (600-750 words)

Intro: Create a personal statement about what you have learned so far as a university student through the lens of LDRS 101 (E.g., “I never thought that my academic learning could be enhanced by digital skills. Now I realize...”)

Body: Explain your artifact selection with a written reflection.

- Reflect on your artifacts: Answer the following questions for each artifact:
 - Why did you select this artifact? Why is this artifact important to you?
 - How does this artifact represent significant growth or accomplishment of a LDRS 101 learning outcome? Be sure to state which learning outcome has been met.
 - Note: You may want to think about what was valuable in the learning process of creating this artifact as well as the artifact itself. For example, you might select an artifact that represents how feedback from assessment conversation helped deepen your understanding of a concept.
- **Formatting:** Your reflective statement should be created as a new post on your blog OR as a new file in your Obsidian vault. You must include links in your statement to each artifact that you choose and complete your reflections in the reflective statement. Both Obsidian and WordPress will automatically create backlinks on the artifact files/posts.

Conclusion: Based on your overall learning in this course, describe what your hopes, intentions, or plans are for your academic and professional journey as it relates to the digital world. Identify at least three action-orientated goals you can set for yourself.

Step 4: Publish!

Publish your reflective statement as a static page to your WordPress site or a new file in your Obsidian vault. Don't forget to add it to your WordPress menu (if you use WordPress for this activity) so your audience can navigate to it easily.

Note: If you have a more personally engaging way to represent this reflective statement, please share your idea with your instructor for approval. It must address all the instructions in step 3, and it must be a timeless, summarizing, and convergent product of your learning, regardless of form.

Part 2: Assessment Conversation

In addition to submitting your e-portfolio you will meet with your instructor for an assessment conversation. This conversation is an opportunity for you to explain your learning process and demonstrate your understanding of the course learning outcomes.

Note: As with Assignments 1 and 2, you will use your **Competency Development Tracker** to self-assess your proficiency level. Be sure to share a link to your tracker with your instructor before the assessment conversation.

See the section below on Assessment Feedback for the grading rubrics used in this course. Also refer to the Assessment section in Moodle for updated assignment details.

Course Discussions

In this course, we ask you to discuss ideas with your peers via Discourse, WordPress and other social media platforms. These discussions are *ungraded* and an important part of your assignments in this course. Consider for example, two course learning outcomes that relate to online discussions:

- Develop personal and professional learning networks to discover and share knowledge, collaborate with others, and become engaged digital global citizens.
- Create inclusive digital communities which embody a sense of belonging, connection, and Christian hospitality.

Your discussion posts may be used as learning artifacts to demonstrate your understanding of the course learning outcomes. *We want to encourage you to use discussion forums as opportunities to connect with your peers and practice your digital literacy skills.*

Assessment Feedback

Your progress in this course will be assessed based on how well you demonstrate competency in the course learning outcomes (CLOs), which are equally weighted. Rather than focusing on point-based grading, this course uses a competency-based assessment approach, which means:

- You will complete a series of learning activities and assignments that provide opportunities to demonstrate your understanding of the CLOs.
- Your work will be evaluated holistically, considering how well you meet the learning outcomes rather than simply accumulating points.
- You will be asked to exercise evaluative judgment, meaning you will reflect on your own work, assess your level of proficiency, and provide evidence of your learning.
- Your instructor will work with you to appraise your progress, offering feedback to help you deepen your understanding and refine your work.

To measure competency, we use a proficiency scale that helps both learners and instructors assess whether assignments are completed at an appropriate level. This scale includes five levels of proficiency: Not Demonstrated, Emerging, Developing, Proficient, and Extending. Each level reflects the depth of understanding and application of the course learning outcomes.

This approach ensures that assessment is focused on growth, reflection, and mastery rather than simply grading tasks.

Emerging	Developing	Proficient	Extending
The student demonstrates an initial understanding of the concepts and competencies relevant to the expected learning.	The student demonstrates a partial understanding of the concepts and competencies relevant to the expected learning.	The student demonstrates a complete understanding of the concepts and competencies relevant to the expected learning.	The student demonstrates a sophisticated understanding of the concepts and competencies relevant to the expected learning.

Feedback will be communicated with you in two different ways. First, and most important, there will be at least two **assessment conversations** that you will be required to attend with your instructor. During this assessment interview, you will need to highlight what you have learned and which

artifacts from the course you use as evidence of your learning. You and your instructor will use the **Competency Development Tracker** to guide this conversation. By the end of the conversation, you will have a clear picture and record of your level of proficiency on each of the Course Learning Outcomes addressed in that particular assignment and you will have a plan for improving your level of proficiency on future assignments.

Second, your instructor will record your level of proficiency on each outcome in the Moodle gradebook. It will be your responsibility to ensure that the proficiency levels shown in the Competency Development Tracker align with what is shown in the gradebook. During the course, the Moodle Gradebook will be considered the correct record. However, your grade is not official until it is entered into the university Portal at the end of your course.

The Competency Development Tracker

The Competency Development Tracker is a structured tool designed to help you monitor your progress in achieving the course learning outcomes. This document serves as both a reflection tool and a progress log, allowing you to track how your work demonstrates competency across different assignments.

How It Works

- **Aligns Assignments with Learning Outcomes:** The tracker maps each assignment to the course learning outcomes and provides proficiency indicators to help you evaluate your level of understanding.
- **Encourages Evaluative Judgment:** As you complete each assignment, you will self-assess your progress, identify areas of strength, and recognize opportunities for improvement.
- **Facilitates Reflection:** You will use the tracker to document insights from your learning process, connect course concepts to real-world applications, and prepare for discussions with your instructor.
- **Supports the Assessment Conversation:** This tracker is a shared document between you and your instructor, providing a structured way to demonstrate your growth, defend your progress, and receive targeted feedback during your scheduled assessment conversation.

How to Use It

1. **Update your tracker** as you complete each assignment, indicating your proficiency level and reflecting on your learning.
2. **Use it as a guide** to prepare for your assessment conversation, highlighting key learning moments and areas where you seek feedback.
3. **Engage in meaningful reflection**, considering how your skills are developing and how you can continue improving.

This tracker is not just a record of work—it's a tool to help you take ownership of your learning, practice self-assessment, and develop competencies that extend beyond the course.

Grading Rubric

Your instructor will use the following grading rubric as shown in the Competency Development Tracker to assess your understanding and application of the digital skills learned in this course. Learners are encouraged to self-assess their work and practice evaluative judgement.

Course Learning Outcomes (I can...)	Proficiency Criteria (This means I can...)	Self- Assessment (My strengths and goals for improvement)	Formative Feedback (Instructor feedback on strengths and goals)	Level of Proficiency
1. Build and customize technology-integrated workflows to enhance and enrich your learning journey.				
2. Apply digital literacy skills to evaluate the legitimacy, credibility and reliability of online resources for academic study.				
3. Practice evaluative judgment to document your process of learning in complex domains of knowledge.				
4. Create a personalized narrative to document and express your learning process.				
5. Evaluate digital tools, platforms, and interactions based on ethical principles.				
6. Develop personal and professional learning networks to discover and share knowledge, collaborate with others, and become engaged digital global citizens.				
7. Create inclusive digital communities which embody a sense of belonging, connection, and Christian hospitality.				

Course Grading

Understanding Proficiency Levels and Final Grades

Your progress will be assessed based on how well you demonstrate competency on the Course Learning Outcomes (CLOs). Instead of focusing on points or percentages, this approach emphasizes your ability to apply what you've learned. Your proficiency will be evaluated at different levels, and your final grade will be based on your performance across all seven CLOs.

You must complete all assignments to receive a grade in this course.

There are two steps to determining your final grade in the course.

Proficiency Levels: Determining Your Learning Progress

First, at the end of your course, you will have a record of your proficiency levels on each of the Course Learning Outcomes based on your work on each of the assignments. In LDRS 101, you will have three proficiency ratings for outcomes 1-7 and two proficiency ratings for outcomes 5-7. Based on that data, your instructor will determine a final rating for each outcome based on all of your attempts. The following guidelines outline how the final proficiency rating may be determined. Given the developmental nature of learning, your instructor may prioritize demonstrations of proficiency that come later in the course.

- **Extending** – You must achieve an *Extending* rating on at least two assessments.
- **Proficient** – You must achieve a *Proficient* rating on at least two assessments.
- **Developing** – You must achieve a *Developing* rating on at least two assessments.
- **Emerging** – You must achieve an *Emerging* rating on at least two assessments.
- **Not Demonstrated** – If two or more CLOs are rated as Not Demonstrated, this level is assigned.

Final Letter Grade Aggregation

Second, based on their final rating for each of the outcomes, your instructor will use the following information to determine your final grade.

Your final letter grade is determined by your proficiency across the seven CLOs:

- **A** – At least 5 of the 7 CLOs must be at **Extending**, with no rating below Proficient.
- **B** – At least 5 of the 7 CLOs must be at **Proficient**, with no rating below Developing.
- **C** – At least 5 of the 7 CLOs must be at **Developing**, with no rating below Emerging.
- **D** – At least 5 of the 7 CLOs must be at **Emerging**, with no Not Demonstrated ratings.
- **F** – Assigned if 2 or more CLOs are rated as **Not Demonstrated**.

This grading structure ensures that your final grade reflects your overall competency across the course learning outcomes, rewarding both depth and consistency in your learning. It is designed to keep you actively engaged in your learning and focused on developing the skills necessary for success. If you have any questions about how your work is assessed, please reach out to your instructor.

University Standard Grading System

To ensure consistency in the assignment of grades and to inform students of assessments of the quality of work at the undergraduate level, the following interpretation of grades in assignments and courses offers a guideline.

Letter Grade	Grade Description
A	Outstanding, excellent work ; exceptional performance with strong evidence of original thinking, good organization, meticulous concern for documented evidence, and obvious capacity to analyze, synthesize, evaluate, discern, justify, and elaborate; frequent evidence of both verbal eloquence and perceptive insight in written expression; excellent problem-solving ability in scientific or mathematical contexts with virtually no computational errors; demonstrated masterful grasp of subject matter and its implications. Gives evidence of an extensive and detailed knowledge base. (Note: The A+ grade is reserved for very rare students of exceptional intellectual prowess and accomplishment, especially in lower-level courses.) Proficiency Scale: Extending
B	Good, competent work ; laudable performance with evidence of some original thinking, careful organization; satisfactory critical and analytical capacity; reasonably error-free expository written expression, with clear, focused thesis and well-supported, documented, relevant arguments; good problem-solving ability with few computational or conceptual errors in scientific subjects; reasonably good grasp of subject matter but an occasional lack of depth of discernment; evidence of reasonable familiarity with course subject matter in both concepts and key issues. Exhibits a serious, responsible engagement with the course content. Proficiency Scale: Proficient
C	Adequate, reasonably satisfactory work ; fair performance but infrequent evidence of original thinking or the capacity to analyze, synthesize, or evaluate course material; undue reliance on rote memory; difficulty in applying knowledge in unfamiliar contexts; limited problem-solving ability in scientific subjects; fairly clear but quite uninspiring written expression with occasional problems in mechanics or syntax; weak in provision of documented, illustrative, or descriptive evidence; satisfactory grasp of basic elements of the course but frequent lapses in detailed understanding. Satisfies the minimum requirements of the course. Proficiency Scale: Developing
D	Minimally acceptable work ; relatively weak performance with little evidence of original thinking or ability to analyze or synthesize course material; nominal or weak problem-solving ability in scientific subjects; written expression frequently exhibits difficulty in articulating a central thesis or sustaining a coherent argument; ideas are trite or juvenile without discernible development. Shows inadequate grasp of some basic elements of the course. Proficiency Scale: Emerging

F	Inadequate work ; poor performance that indicates a lack of understanding or misunderstanding of essential subject matter; seems easily distracted by the irrelevant; written expression is poorly organized, often incoherent, and rife with mechanical and diction errors. Shows little evidence of even basic competency in the course content or skills.
----------	---

For more information please see the [University Standard Grading System](#) website.

Course Policies:

As a TWU student, you are expected to carefully read the [Undergraduate Syllabus Policies/Statements](#). If you have any questions about the policies, you are encouraged to reach out to your instructor for clarification.

Academic Integrity and Avoiding Plagiarism at TWU

One of the core values of Trinity Western University is the integration of academic excellence with high standards of personal, moral, and spiritual integrity. The University considers it a serious offence when an individual attempts to gain unearned academic credit. It is the student's responsibility to be informed about what constitutes academic misconduct. For details on this, and on identifying and avoiding plagiarism go to this [link](#).

- [Prezi presentation](#)
- [Google Slide presentation offering more comprehensive information](#)

Campus Closure and Class Cancellation

In the event of extreme weather conditions or other emergency situations refer to the [TWU website](#).

USE OF GENERATIVE AI

TWU places a high value on academic integrity. Using an AI tool can shortcut the process of critical thinking, academic originality, and personal responsibility for content. Allowing partial use of AI in this course should not be viewed as circumventing this process.

Because assignments in this course require you to demonstrate a high level of critical and original thought, the use of AI tools for producing initial content is permitted in some cases, but only as a starting point.

If you use an AI tool to complete an assignment, you must:

- Fact check with original sources. You will be responsible for any errors or omissions provided by the tool.

Course Statements:

Academic Freedom

With our charter, mission, and identity as a Christian university, Trinity Western University is committed to academic freedom, affirming and supporting it as defined and described in the

statements of Universities Canada and the Tri-Council Research Granting Agencies provided in full at the following link: <https://www.twu.ca/academic-freedom-trinity-western-university>.

Students should familiarize themselves with both the academic freedom statement and policy found at the Academic Freedom website. In this course, the academic freedom of both the course instructor and students is to be respected. Trinity Western University welcomes a diversity of academic perspectives, both in class discussion and submitted course work, provided they are thoughtfully and respectfully presented. Hate speech will not be tolerated.

Accessibility Statement

The Centre for Accessible Learning oversees academic accommodations for students with a disability at TWU. Academic accommodations are specific, recommended provisions that enable students with disabilities to have an equitable opportunity to meet course and program learning outcomes, and are guided by the [TWU Accessible Learning Policy](#). Students whose disability affects their academic progress are invited to register with the Centre for Accessible Learning to determine their eligibility for academic accommodations. Medical documentation requirements and the registration process are outlined on the [Centre for Accessible Learning website](#).

Hospitality in the Classroom

TWU is committed to an ethic of inclusion centred on the principles of Christian hospitality, reciprocity and reconciliation. We seek to cultivate generous learning spaces that are based on respect for differences and are open to diverse views, opinions, and identities that are thoughtfully expressed in a collegial manner. We welcome and value all voices, including those from under-represented groups or those who have been marginalized.

TWU Writing Centre

The Writing Centre is available to assist all students with their academic writing assignments in any subject at any stage of the writing process from brainstorming to editing. Live, online writing appointments are available throughout the week by appointment and take place within the Learning Commons appointment booking system. To make an appointment, visit www1.twu.ca/writingcentre. For undergraduates, online writing feedback is offered through WriteAway. Students can submit up to three drafts of a paper, and the online tutors will provide feedback and resources to help improve the writing. Find out more at <https://writeaway.ca>. For more information, visit <https://www.twu.ca/academics/academic-professional-support/learning-commons/writing-centre> or contact writingcentre@twu.ca.

Course Outline:

Unit	Topics
Unit 1: Introduction to Digital Literacies for Online Learning	1. Learning Online 2. Understanding the Digital 3. Starting Your Workflow 4. Digital Literacies 5. Digital Privacy and Safety
Unit 2: Discovering and Curating Resources	1. Finding & Selecting Resources 2. Evaluating Resources 3. Citation Management 4. Openness in Education
Unit 3: Connecting Ideas for Learning	1. Sense-making Through Hyperlinks 2. Sense-making Through Tags 3. Note-Taking 4. Concept Maps 5. Digital Tools to Support Learning
Unit 4: Building Your Online Presence	1. Personal Learning Environments 2. Building a Learning Blog 3. My Digital Footprint 4. Evaluating Digital Tools
Unit 5: Building a Network of People	1. Digital Citizenship 2. Online Communities 3. Connecting & Learning through Social Media 4. Joining the TWU Community
Unit 6: Sharing Your Knowledge	1. Sharing Your Learning at TWU 2. Digital Practices in the Workplace 3. Societal Issues & the Internet 4. Digital Wisdom

Course Schedule

Below you will see recommended schedules for the 6-week, 3-month and 6-month timeframes. Note, you have the flexibility to submit assignments at any time within the 6 months. However, it is highly recommended to submit your first assignment within the initial 3-4 weeks to make the most of the valuable feedback provided by your instructor.

6 Weeks	3 Months	6 Months	Learning Activities and Assessments
Week 1	Month 1	Month 1	- Read the course syllabus thoroughly. - Connect with peers and instructors in Discourse. - Complete Unit 1, including learning activities and required readings.
Week 2		Month 2	- Complete Units 2-3, including learning activities and required readings. - Submit Assignment 1: Reflective Journal - Schedule your Assessment conversation with your instructor (Part 2 of Assignment 1). - Send a link or copy of your Competency Development Tracker to your instructor prior to the meeting. - Meet with your instructor and review feedback to prepare for the next assignments.
Week 3	Month 2	Month 3	- Complete Unit 4, including learning activities and required readings. - Review instructions for Assignment 2 & Assignment 3.
Week 4		Month 4	- Complete Unit 5, including learning activities and required readings. - Submit Assignment 2: Digital Literacy Blog - Self-assess using your Competency Development Tracker and review instructor feedback.
Week 5	Month 3	Month 5	- Complete Unit 6, including learning activities and required readings. - Work on Assignment 3: Digital Literacy Portfolio.
Week 6		Month 6	- Submit Assignment 3: Digital Literacy Portfolio. - Schedule your Assessment conversation with your instructor (Part of Assignment 3) - Meet with your instructor and review feedback using your Competency Development Tracker. - Complete the End of Course Survey - Student Experience of Teaching & Learning.

Student Experience of Teaching & Learning

YOUR FEEDBACK MATTERS!

At the conclusion of this course, your input becomes invaluable in shaping the future learning experiences for your peers. Your perspectives on the course content, assessment, online navigation, and overall experience are essential in enhancing the quality of online courses at TWU.

Why Complete the Course Survey?

- Reflect on Your Experience: Take a moment to consider the knowledge gained, challenges overcome, and skills acquired throughout the course.
- Influence Future Offerings: Your feedback guides us in refining and adapting the course to better meet the needs of future students.

How to Participate:

- Look out for the link for Student Experience of Teaching and Learning.
- Thoughtfully share your insights on the course content, course design methods, and any suggestions for improvement.
- Your feedback is anonymous, providing a safe space to express your honest opinions.

Your active participation in the course survey is a valuable contribution to the ongoing enhancement of our academic programs. Thank you in advance for taking the time to help us create a better learning environment for future students!
